

Dr. Gulshat Amirkhanova, PhD

Department of Artificial Intelligence
and Big Data, Faculty of Information Technology
Al-Farabi Kazakh National University
71, al-Farabi ave., Almaty 050040, Kazakhstan

Employing cloud-based business intelligence solutions to administer a university

The benefits of using cloud-based business analytics for efficient decision-making include quick access to reliable information, real-time monitoring, visual data representation, focus on essential details, fact-based decision-making, reduced reporting workload, the ability to conduct personal research, dynamic presentation, and multidimensional data analysis, all supported by cloud technology for seamless data storage and transmission.

Gulshat Amirkhanova is a highly accomplished professional in Applied Mathematics and Informatics. She graduated from Al-Farabi Kazakh National University in 2001 with a degree in Applied Mathematics. In 2003, she earned a Master's degree in Informatics, and in 2017, she completed her PhD in Informatics. Currently, Gulshat serves as a Senior Lecturer in the Faculty of Information Technology at Al-Farabi Kazakh National University. Her research interests include Optimal Control Theory, Economic Process Modeling, Mathematical Modeling, Nanotechnology Modeling, and Big Data. She has actively participated in several research projects and published numerous papers in esteemed conferences and journals. Gulshat is known for her excellent communication skills, proactiveness, and sense of responsibility. Gulshat Amirkhanova's contributions extend beyond academia; she co-edited the monograph "Digital Solutions to Improve University Management Quality" in 2022. She is a distinguished mathematician and informatics specialist, making significant strides in research and education, and playing a crucial role in university management.
